

VVR – Recommended installation

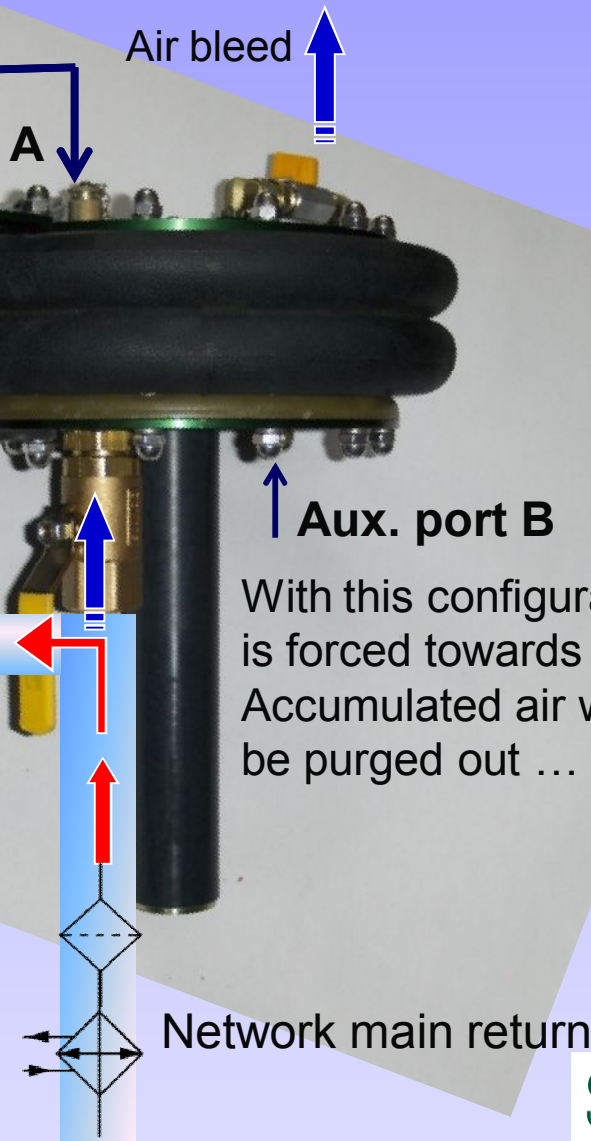

SAE-12 auxiliary port (A)

**Parker EZ form
7219 series
or equivalent

Pump / motor case drain return
line can be routed to the VVR's top
cover SAE-12 port (A) through a
flexible hose** or at the auxiliary
SAE-16 port (B)

With this configuration, returning air
is forced towards the VVR.
Accumulated air will gather, ready to
be purged out ...

VVR— Recommended Installation
with air separator
